

## Do You Have Vision?

Vision allows you to:

- Store event monitoring data securely in the cloud
- Share information with stakeholders
- Access data at any time, from anywhere
- Immediately see vibration and overpressure trends
- Set alarm and warning levels for each project
- Locate monitoring units on a map or image
- Add comments to and print event reports
- Control what level of information each user can see

Vision from InstanTel is a cloud-based data hosting application for event data that takes the pain out of satisfying even the most demanding reporting requirements.

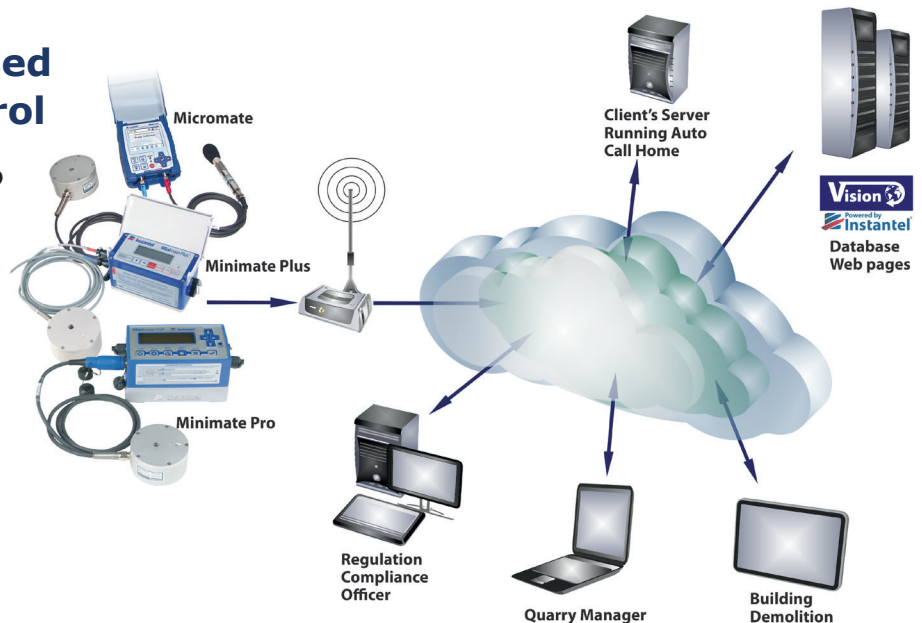

Leave the data management to Vision so that you can get back to doing what you do best—managing your project.

Using InstanTel's

### Cloud-based data control

proprietary Auto Call Home™ technology, vibration data uploads to Vision immediately after it is collected, not hours—or even days—later.

Once the data uploads, Vision provides secure, encrypted web-based access to the latest information from any desktop, laptop or tablet with access to the web.

With web-based hosting, your stakeholders will be able to access the data they need at the time that they need to, providing instant sharing for time sensitive projects.

# Instantel® Vision™

## Innovation

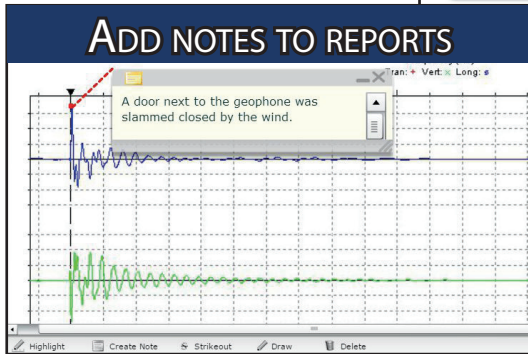

Vision delivers a wide array of powerful features that simplify your day to day tasks. Vision gives you the power to:

- View and download event data from anywhere in the world for up to date information no matter your location.
- View, sort, filter, and print event data to identify trends before they become issues.

- Add comments to your event reports to highlight vital information. Print event reports from anywhere.
- Map your site—using technology from Google, you can place your monitoring units on a street or satellite map.
- Upload photos for a record of the latest progress.

Units			
Viewing 1-6 of 11		Sort: Unit Name	
<input type="checkbox"/>	East Off Ramp Minimate Pro4	0	MP1234 Assigned I-90 Expansion
<input type="checkbox"/>	South Face Near Crusher	0	UM6012 Assigned Light Rail Project
